OFFICE OF THE PRIVATE SECRETARY TO HIS EXCELLENCY THE VICEROY.

NOTIFICATION.

New Delhi, the 4th March 1942.

No. 44-H.—His Excellency the Viceroy has been pleased to award the Indian Police Medal to the following officer:—

Bengal.

Radha Prosad Pandey, Constable No. 1493, of the 24-Parganas District.—On the night of the 20th November 1941 Constable Radha Prosad Pandey, while on patrol duty with a Head Constable, heard sounds of gun-fire and cries of alarm in the distance. He and the Head Constable ran to the place whence these sounds came, and found that a dacoity was in progress in a house there, the inhabitants of which were putting up a spirited resistance. On their arrival the dacoits fled, and although none of the inhabitants came to their assistance, these two Police officers gave chase, despite the fact that they had reason to believe that the dacoits were armed with guns. Constable Pandey succeeded in overtaking and pulling down one of the dacoits, who seriously wounded him by stabbing him in the thigh with a dagger. Despite this injury the Constable clung on to his adversary until the Head Constable arrived and felled the latter with a lathi. Constable Pandey showed great promptitude and initiative and his conduct was of a most gallant character.

This award is made for gallantry under regulation (*d*) (*i*) of the regulations governing the grant of the Indian Police Medal and consequently carries with it the allowance admissible to officers of and below the rank of Inspector of Police.

PART VI

Bills introduced in the Council of State and Legislative Assembly; Reports of Select Committees presented to the Council and Assembly; and Bills published under Rule 18 of the Indian Legislative Rules

GOVERNMENT OF INDIA.

Legislative Assembly Department.

The following Bill was introduced in the Legislative Assembly, on the 14th February, 1942:—

L. A. BILL No. 11 OF 1942.

A Bill to limit rates of interest and for that purpose further to amend the Usurious Loans Act, 1918.

WHEREAS it is expedient to limit the rates of interest and for that purpose further to amend the Usurious Loans Act, 1918; It is hereby enacted as follows:— X of 1918.

Short title.

1. This Act may be called the Usurious Loans (Amendment) Act, 19 .

Amendment of section 3, Act X of 1918.

2. In section 3 of the Usurious Loans Act, 1918 (hereinafter referred to as the said Act),— X of 1918.

(*1*) in sub-section (*1*),—

(*a*) in clause (*a*), for the word "and" occurring at the end the word "or" shall be substituted;

(*b*) for the words "may exercise all or any of the following powers" the words "shall exercise all the following powers or all such of them as may not be inappropriate to the case" shall be substituted; and

(*c*) in the proviso,—

(*i*) the brackets and figure "(*i*)" occurring in clause (*i*) shall be omitted; and

(*ii*) clause (*ii*) shall be omitted;

(2) in sub-section (2),—

(a) for clause (a) the following shall be substituted, namely:—

"(a) In this section, 'excessive' means—

(i) in excess of interest calculated at the rate of six per cent. per annum with annual rests or

(ii) if the Reserve Bank of India's rate at the date of the loan exceeds three per cent. per annum, in excess of interest calculated at three per cent. above such Reserve Bank rate with annual rests:

Provided that if the Court considers that having regard to the risk incurred as it appeared, or must be taken to have appeared to the creditor at the date of the loan a lower rate of interest was reasonable, all interest in excess of such rate shall be deemed 'excessive' "; and

(b) the *Explanation* shall be omitted; and

(3) to sub-section (3) the following shall be added at the end, namely:—

"or if such suit is instituted by a debtor for any of the reliefs specified in sub-section (1) of section 3".

Amendment of section 4, Act X of 1918.

3. In section 4 of the said Act, for the words "may exercise" the words "shall exercise" shall be substituted.

Insertion of new section 5 in Act X of 1918.

4. After section 4 of the said Act, the following section shall be added, namely: —

Punishment for evasion of Act relating to maximum rates of interest.

"5. Any person who evades or attempts to evade the provisions of this Act prescribing the maximum rate of interest by actually lending a smaller sum than that shown in the agreement or instrument executed by the debtor or in any other manner whatsoever, shall be punishable with fine not exceeding the sum of (a) one thousand rupees and (b) twice the amount which has been paid to him in consequence of such evasion or would have been paid to him if the attempted evasion had been successfully carried out."

STATEMENT OF OBJECTS AND REASONS.

It is an admitted fact that the high rate of interest forms a heavy burden and is one of the chief causes of agricultural indebtedness. It is also well-known that low rates of interest prevailing in the cities have little effect on the usurious rates prevailing in the rural areas. The object of the Bill is to limit the rate of interest and thus relieve the masses from the exploitation and extortion of moneylenders. The simplest method of doing this is to amend the Usurious Loans Act, 1918. The measure has been adopted in certain Provinces but in a matter like this uniformity is greatly needed.

GOVERNMENT OF INDIA.

Legislative Assembly Department.

The following Bill was introduced in the Legislative Assembly, on the 16th February, 1942:—

L. A. BILL No. 13 OF 1942.

A Bill to provide for the extension of the time limited by or under the Indian Patents and Designs Act, 1911, for the doing of acts thereunder.

WHEREAS it is expedient to provide for the extension of the time limited by or under the Indian Patents and Designs Act, 1911, for the doing of acts thereunder; II of 1911.

It is hereby enacted as follows:—

Short title, extent and duration.

1. (*1*) This Act may be called the Indian Patents and Designs (Extension of Time) Act, 1942.

(*2*) It extends to the whole of British India.

(*3*) It shall be in force until the termination of the present hostilities and for one year thereafter.

Power to extend time limits having regard to war circumstances.

2. (*1*) The Controller of Patents and Designs appointed under the Indian Patents and Designs Act, 1911, may, subject to such conditions, if any, as he thinks fit to impose, extend the time limited by or under that Act for doing any act, where he is satisfied— II of 1911.

(*a*) that the doing of the act within the time so limited was prevented by a person's being on active service or by any other circumstances arising from the existence of the present hostilities which, in the opinion of the Controller, justify an extension of the time so limited, or

(*b*) that, by reason of circumstances arising from the existence of the present hostilities, the doing of the act within the time so limited would have been or would be injurious to the rights or interests of the person by or on whose behalf the act is or was to be done or to the public interest.

(*2*) An extension under this section of the time for doing any act—

(*a*) may be for any period that the Controller thinks fit, notwithstanding that under the Indian Patents and Designs Act, 1911, power is conferred to extend the time for doing that act for a specified period only; and II of 1911.

(*b*) may be granted, notwithstanding that that time expired before any application or request for extension was made, or that, by reason of that act not having been done within that time, the relevant application, patent, registration or proceeding has ceased or expired, or become void or invalid, or been treated as abandoned, or been refused.

STATEMENT OF OBJECTS AND REASONS.

It has been demonstrated that applicants under the Indian Patents and Designs Act, 1911, have been prevented from completing the proceedings instituted by them under certain sections, *e.g.*, section 14(*2*), section 78A(*1*), etc., of the Act within the time-limits prescribed, on account of their participation in the war or on account of conditions arising out of the war. The proceedings have thereupon been deemed to have been 'refused' or 'abandoned'. The object of the present Bill is to confer powers on the Controller of Patents and Designs to extend the time-limits in such cases so as to enable the applicants to revive the proceedings originally instituted by them if they so desire.

BILL

to amend the Bengal Local Self-Government Associations (Recognition) Act, 1936.

WHEREAS it is expedient to amend the Bengal Local Self-Government Associations (Recognition) Act, 1936, for the purpose and in the manner hereinafter appearing ; Ben. Act XVI of 1936.

It is hereby enacted as follows :—

Short title.

1. This Act may be called the Bengal Local Self-Government Associations (Recognition) Amendment Act, 1942.

Amendment of section 4 of Bengal Act XVI of 1936.

2. In section 4 of Bengal Local Self-Government Associations (Recognition) Act, 1936,—

(*a*) after the words " a general meeting " the words " or a meeting of an executive committee " shall be inserted, and

(*b*) for the words " the meeting " the words " such a meeting " shall be substituted,

and to the said section the following proviso shall be added, namely :—

" Provided that travelling expenses shall not be paid to a member of a local authority for attending in one year more than three meetings of an executive committee referred to in this section."

STATEMENT OF OBJECTS AND REASONS.

Under the existing provisions of the Bengal Local Self-Government Associations (Recognition) Act, 1936, a member of a local authority, which contributes to the funds of an association recognized under the Act, may be paid, out of the respective local fund, travelling allowance for attending a general meeting of the association as a representative of that local body. He cannot, however, be allowed the travelling expenses for attending any other meeting of the association.

If such an association is to function properly the members of its Executive Committee have to meet from time to time. In order to facilitate the holding of such meetings it is proposed to amend the Act so as to empower the local authorities concerned to pay the travelling expenses of their representatives on such committees, from their own funds for attending not more than three meetings of the Executive Committee of an Association in any one year.

A. AHMAD,
Personal Assistant to Director of Agriculture, Bengal.

Dacca, the 13th April 1942.

DEPARTMENT OF AGRICULTURE, BENGAL

Ramna, Dacca, the 2nd April 1942.

Forecast of the Rabi Crops of Bengal for the year 1941-42.

(*Note*.—On average of the five years ending 1939-40, the area under summer rice in Bengal has represented some 0·5 per cent. of the total area under rice in India.)

Character of the season. Field operations and sowings commenced under favourable weather conditions. At advanced stage of the growth, however, the crops in certain areas were adversely affected by drought. Some damage is also reported to have been caused by insect-pests.

Acreage.—The normal area under the different *rabi* crops dealt with in this forecast is estimated at 3,751,400 acres. The area actually sown this year is reported to be 3,588,900 acres as against 3,579,500 acres (revised) last year. Of this, the area under summer rice is reported to be 443,600 acres as against 437,400 acres last year, and that under tobacco is 321,500 acres as against 321,800 acres last year.

Outturn. According to the District Officers' estimates, the average outturn of the different *rabi* crops for the province, as a whole, works out at 82 per cent. of the normal as against 75 per cent. last year, while the outturns for the more important *rabi* districts are as follows:—

Mymensingh 100, Dacca 95, Rangpur 79, Murshidabad 84, Faridpur 76, Pabna 69, Noakhali 70, Rajshahi 67, Bakarganj 92, Tippera 79, Nadia 74, Jalpaiguri 89, Malda 79, and Bogra 80 of the normal.

Summer rice and tobacco crops.—The outturn of summer (*boro*) rice for the province as a whole according to the District Officers' estimates is 93 per cent. of the normal as against 88 per cent. last year. The gross yield of the crop for the province on a basis of the normal yield of 11¾ maunds of clean rice per acre is estimated at 217,200 tons this year as against 202,700 tons last year.

The outturn of tobacco crop is estimated at 82 per cent. of the normal as against 77 per cent. last year. Taking 986 lbs. as the normal yield of the crop per acre, the gross yield of the crop for the province this year is estimated at 116,000 tons this year as against 108,300 tons last year.

PRESS COMMUNIQUE.

8, Clive Street, Calcutta, the 2nd April 1942.

Price of special quality atta manufactured by the Hindusthan Atta Mills.

On the 19th March 1942, the Chief Controller of Prices, Bengal, issued an order fixing the selling price of red and white atta at Rs. 7-8 and Rs. 8-4 respectively *ex*-mill. There is one variety of red atta, viz., Chandausi atta manufactured by the Hindusthan Atta Mills which was not taken into consideration in fixing the selling price for red atta. This Chandausi atta is superior in quality to all ordinary red atta and is specially prepared by the stone grinding process as opposed to the roller grinding process. For the convenience of the public it has been decided to bring this atta also under control and to fix a price for it. The price of this atta has been fixed at Rs. 8-2 per maund *ex*-mill. The retail price would be about 12 annas higher. For details regarding prices, a reference may be made to the order issued by the Chief Controller of Prices, Bengal.

ORDER.

In exercise of the power conferred by rule 81 *(2) (b)* of the Defence of India Rules and in partial modification of the orders, dated the 19th March 1942, the price of red Chandausi atta manufactured by the Hindusthan Atta Mills, is fixed as follows:—

Red Chandausi atta.	Price *ex*-mill.	Wholesale bazar price.	Retail bazar price.
Hindusthan Atta Mills ..	Rs. 8-2-0 per maund.	Rs 8-4-0 per maund	Rs. 8-14-0 per maund or 3 as. 7½ pies per seer.

Resolution on the Report of the Director of Public Health, Bengal, for the year 1940.

GOVERNMENT OF BENGAL.

Department of Public Health and Local Self-Government.

Public Health.

RESOLUTION—No. 693P.H.

CALCUTTA, THE 15TH APRIL 1942.

Read the Report of the Director of Public Health, Bengal, for the year 1940.

Vital Statistics.—There were 1,681,846 births registered in the year under report as against 1,597,651 in the preceding year—a rise of 84,195. The birth-rate was 33·7 per mille being 5·3 per cent. above the rate of 1939. 1,111,082 deaths were registered in 1940 as compared with 1,090,530 in the previous year—an increase of 20,552, the death-rate being 22·3 per mille and 1·8 per cent. above that of the preceding year. The total births exceeded the deaths by 570,764 against an excess of 507,121 in 1939. As in the previous year, Calcutta was the solitary district in which deaths exceeded births. The birth-rate in Bengal in the year under review was lower than in all other provinces except Bihar, Assam, North-West Frontier Province and Sind; so also was the death-rate except in the case of United Provinces and the other provinces mentioned. The highest birth-rate was recorded in the district of Nadia (42·3 per mille) followed by Murshidabad (41·9), and the lowest in Malda (24·6) which has been uniformly showing low birth-rates during the previous triennium. As in the past three years, the highest death-rate during the year under report, was recorded in the district of Darjeeling (31·3) while the lowest was recorded in Malda (15·7). The proportion of male births in every 100 female births was 108 against 107 in 1939, while the proportion of male deaths in every 100 female deaths was also 108 against 109 in 1939. The Director of Public Health, Bengal, has pointed out in this connection that the predominance of male births over female births is a feature common to all the provinces of this country though the ratio varies from province to province.

It must, however, be observed that, generally speaking the system of record of vital statistics in this country is by no means perfect or as satisfactory as it should be and the margin of inaccuracy which undoubtedly exists cannot be gauged. The question of evolving a sound system of collection of vital statistics in this province is however engaging the attention of the Public Health Department of Government.

Infantile and Maternal Mortality.—The total number of infantile deaths in 1940 was 267,894 compared to 234,301 in 1939. The infant mortality rate recorded an increase, being 159·3 per mille against 146·6 in 1939. The infantile deaths represented 24·1 per cent. of the total mortality in the province during the year under review. 55 per cent. of the infant mortality were recorded among infants under one month, 29·4 per cent. among infants between one and six months and 15·6 per cent. among those between six

and twelve months. There were 69,844 still-births registered in the year 1940, yielding a rate of 4·2 for every hundred live births as against 4·1 in 1939. Maternal causes were responsible for 15,758 deaths during the year under report as against 15,792 in the preceding year. Apart from the possibly large margin of inaccuracy in recording this class of deaths, there must have been many deaths associated with, but not ascribed to, child birth for which there is no adequate provision for registration.

Reference has been made, in the resolution reviewing the report for the year 1939, to a scheme, approved by Government, for establishment of maternity and child welfare centres in the rural areas providing a minimum standard of efficiency regarding staff, equipments, buildings, etc. The scheme has been explained at length in the report of the Director of Public Health for the year 1940. According to this scheme three new maternity and child welfare centres were opened during the year 1940 and suitable grants-in-aid were made by Government to the local bodies and voluntary associations concerned. Altogether 18 such centres functioned during the year under review. The Lady Superintendent for Maternity and Child Welfare, Bengal, appointed by Government, rendered assistance to the local bodies and others in formulating proposals for the establishment of maternity and child welfare centres and took steps to encourage the opening of such centres throughout the province. The Model Health Unit established by Government at Singur 1939 provided *inter alia* facilities for institutional service both for prenatal care and midwifery services. The annual grant for the training of indigenous dais was distributed among the different local bodies and other organisations as usual.

General Epidemiology.—Cholera.—A remarkable feature of the year under report was that the mortality from cholera was the lowest on record during the past fifty years. There were 21,743 deaths from this disease with a death-rate of 0·4 per mille as against 33,221 deaths in 1939 with a death-rate of 0·7 per mille—a decrease of 34·0 per cent. over the figures of 1939. Cholera accounted for only 2 per cent. of the total provincial deaths in 1940. The highest death-rates were registered in the districts of Khulna (2·07 per mille), Bakarganj (1·91), 24-Parganas (0·93) and Howrah (0·75) As in the preceding years, no deaths from cholera occurred in Darjeeling. The rural areas recorded 19,881 deaths representing a death-rate of 0·4 per mille against 0·6 per mille in the previous year. The number of deaths in towns was 1,859 with a death-rate of 0·5 per mille compared to 0·9 in 1939.

Cholera preventive measures.—The usual preventive measures were taken. Anti-cholera vaccine was freely used, though the number of inoculations performed fell considerably due to the less severity of cholera epidemics in 1940 as compared with the previous year. The Director of Public Health deputed, as in the preceding years, a number of mobile medical and sanitary units for anti-cholera and other epidemic work. Assistance was also rendered to the local authorities by lending services of medical and sanitary officers during epidemics.

Small-pox.—The mortality from this infectious disease showed a marked decline, the total number of deaths being 5,608 against 7,029 in the preceding year, with a death-rate of 0·11 and 0·14 per mille respectively. The mortality from small-pox thus fell by 20 and 64 per cent. compared with the year 1939 and the previous quinquennium respectively. In fact, the number of deaths from this disease has been steadily decreasing since 1936, as pointed out by the Director of Public Health, and was the lowest on record during the past thirty-five years excluding 1923 and 1924. Small-pox was responsible for only 0·5 per cent. of the total provincial mortality in 1940.

Of the total number of deaths from small-pox 447 occurred among infants under one year of age and 867 among children between one and ten years, against 408 and 748 respectively in 1939.

1,098 deaths from this disease out of a total of 2,393 in the urban areas were recorded in Calcutta alone where the death-rate (0·96 per mille) was, as in the previous two years, highest in the province. Compared with the year 1939, there was a fall of 23·8 per cent. in the motality in the urban areas. The rural areas accounted for 3,215 deaths in 1940 against 3,890 in 1939. The districts of Darjeeling, Rajshahi, Bogra and Malda were practically free from small-pox during the year under report, the lowest death-rate being registered in Darjeeling (0·003).

The number of persons vaccinated in 1940 was 8,476,920 against 7,925,382 in 1939. The increase is a happy sign which might have been due to the greater attention paid by the local authorities in the matter of vaccination than in the previous years. The total cost of vaccination increased from Rs. 4,61,790 in 1939-40 to Rs. 4,70,645 in 1940-41. The average cost of each successful vaccination in the province was 1 anna and 9 pies—a fall of one pie from the figure for the preceding year. The average cost of manufacture of vaccine lymph per dose of half a grain in the Bengal Vaccine Institute amounted to 0·5 pies only, which was cheaper by 0·1 pie than the cost in the previous year.

Fevers.—Malaria and Kala-azar.—Fevers took a heavier toll of lives in 1940 than in the preceding year, the number of deaths being 717,516 and 687,587 respectively and the death-rate being 14·4 and 13·8 per mille respectively against the quinquennial average of 14·8 per mille.

Malaria.—51·5 per cent. of the total mortality from fevers was due to malaria, which again accounted for 33·3 per cent. of the total provincial mortality during the year under review, the corresponding percentages in 1939 being 49·6 and 31·3 respectively. There were 369,448 deaths from malaria in 1940 against 341,321 in 1939, representing an increase of 8·2 per cent. The death-rate correspondingly went up from 6·8 to 7·4 per mille in the year under report. 99·5 per cent. of the deaths from malaria occurred in the rural areas and only 0·5 per cent. in the urban areas compared to 99·4 and 0·6 respectively in 1939. The district of Nadia topped the list with a death-rate of 18·35 per mille followed by Rajshahi (17·94) and Jessore (17·79), the highest death-rate in 1939 being recorded in Rajshahi, viz., 14·6. Calcutta returned the lowest rate, viz., 0·5 which was the same as in the previous year. It is worth noticing that the mortality from malaria in the urban areas has steadily come down from the year 1938, while the problem of malaria in the rural areas has assumed greater magnitude.

Kala-azar.—This disease was responsible for 15,453 deaths with a death-rate of 0·31 per mille as against 17·056 and 0·34 respectively in 1939. The decline in the mortality from kala-azar in the rural as well as urban areas of the province as compared to the previous year, is a welcome feature; the decrease in the number of deaths in the rural areas being 1,543 and that in the urban areas being 60. The highest mortality from the disease (1·3) was recorded in the rural areas of Dinajpur. The number of kala-azar cases admitted into the various hospitals and dispensaries for treatment rose from 98,155 in 1939 to 104,791 in 1940, the rise being large in the districts of Mymensingh, Malda and Khulna. The special anti-kala-azar scheme inaugurated in the district of Darjeeling in December 1937, continued to work satisfactorily during the year under review.

Special anti-malaria measures.—The survey and control measures in connection with the campaign against *anopheles ludlowii* were carried out satisfactorily, as in the previous year, in the Salt Lake area, Budge-Budge and the suburban areas with the co-operation of the Corporation of Calcutta and other local authorities and interests concerned.

The special anti-malaria scheme for the town of Jessore and its surrounding rural areas undertaken in the year 1939 was continued throughout the year under review with success.

Special investigation into the problem of malaria was taken in the year under report by the transfer of the Field Malaria Research Laboratory to Netrakona in the Mymensingh district and also to Kalimpong in the Darjeeling district in order to find out the local vectors and to investigate the various etiological factors responsible for the spread of malaria in the Netrakona subdivision and the mountain regions of Darjeeling respectively.

In accordance with the revised policy of Government to give liberal grants-in-aid to comprehensive anti-malaria schemes of a more or less permanent nature instead of making small grants towards temporary local measures, which has already been referred to in reviewing the report of the Director of Public Health for 1939, two anti-malaria schemes, *viz.*, the Golapganj Drainage Scheme in the district of Malda and the Nadana Khal Re-excavation Scheme in the district of Noakhali, were sanctioned by Government during the year 1940 and a grant equivalent to half of the total estimated cost of these two schemes was made by Government, the other half being met by the district boards concerned. Certain other anti-malaria schemes of different districts were examined and approved by the staff of the Director of Public Health during the year under report before their submission to Government for sanction.

A Malaria Engineer was appointed by Government in the Public Health Department in March 1940 to assist local bodies in drawing up and executing anti-malaria schemes of an engineering type. During the year under review he scrutinized and advised on various comprehensive anti-malaria scheme submitted to the Director of Public Health by different district boards and municipalities of the province.

Respiratory Diseases.—The number of deaths attributed to respiratory diseases of all forms was 85,203 in 1940 as against 88,458 in 1939, the respective rate of mortality being 1·71 and 1·86 per mille. Calcutta, as usual, returned the highest death-rate (8·59), Jalpaiguri came next (5·15) followed by Howrah (3·33) and Hooghly (3·25). It is distressing to note that these districts have been recording high rates of mortality during the previous four years. Malda continued to record the lowest rate (0·26).

Pneumonia.—It accounted for 44,967 deaths against 47,888 in the preceding year, showing a reduction of 6·1 per cent. Pneumonia was responsible for 56·2 per cent. of the total mortality from respiratory diseases. As usual, the highest death-rate was registered in Jalpaiguri (4·2 per mille) and the lowest in Malda (0·1). High rates of mortality were recorded also in the districts of Hooghly, Calcutta, Darjeeling and Dinajpur.

Pulmonary tuberculosis.—This disease took a toll of 12,363 lives against 12,422 in 1939, the death-rates being the same in both the years, viz., 0·25 per mille. More than two-thirds of the total tubercular deaths in the urban areas occurred in Calcutta alone where the death-rate from the disease was 2·65 per mille. The town of South Dum Dum, however, returned the highest rate in the province (5·4 per mille) as in the previous two years. No deaths from tuberculosis were reported from 17 towns in the year under review.

A comprehensive scheme for the prevention and control of tuberculosis in the province, in co-operation with local bodies and voluntary organisations was formulated by the Director of Public Health. Two important items of the scheme, viz.—

(*i*) Special course of training in tuberculosis for medical and health officers and private practitioners, and

(*ii*) provision for better treatment and nourishment of tubercular patients in Sadar hospitals,

were already approved by Government and given effect to and suitable provisions were made for them in the Budget. Two more items of the scheme, viz.—

(*iii*) establishment and maintenance of chest clinics in Sadar hospitals, and

(*iv*) establishment of village isolation centres,

were also approved by Government towards the close of the year under review and suitable provision for the purpose was made in the budget of 1941-42.

The tuberculosis survey started in 1939 at Barisal and Serampore was continued during the year under report and a large number of persons were examined and attended. The Bengal Tuberculosis Association rendered as before valuable service by publicity and propaganda work in the province with the usual grant from Government and maintained six dispensaries in Calcutta and one in Howrah. The Association also organised post-graduate training courses on tuberculosis in Calcutta and assisted in the training of the students for the Diploma of Public Health and the Health Officers deputed by the Government of Bengal.

Other diseases.—Enteric fever.—Deaths registered as due to enteric fever were 7,875 as against 8,290 in 1939. The decrease was comparatively large in urban areas, but the rate of mortality was much higher in those areas than in the rural areas.

Influenza.—There were 2,127 deaths from influenza in 1940 compared to 2,467 in the preceding year. The fall in the number of deaths was solely due to the decrease in mortality in the rural areas, the total deaths in the urban areas being nearly the same as in the previous year. Another striking feature is that Calcutta alone was responsible for 85·5 per cent. of the total mortality in the urban areas.

Cerebrospinal fever.—It accounted for 1,378 deaths against 1,721 in 1939, showing a marked decline in mortality from the disease. 90·2 per cent. of the total deaths from cerebrospinal fever in the urban areas were recorded in Calcutta only. The comparatively large mortality in Calcutta is perhaps due to better classification of the causes of deaths by medical registrars.

Typhus fever.—The number of deaths from this disease further increased from 4,443 in 1939 to 5,183 in the year under report. Calcutta was, however, entirely immune from the disease.

Dysentery and diarrhœa.—These diseases respectively took a toll of 24,730 and 20,692 lives in 1940 as against 27,301 and 27,152 in 1939. There was thus an appreciable fall in the mortality from these diseases. Of the total provincial mortality in the year under review, 4·1 per cent. was attributed to dysentery and diarrhœa together as against 5 per cent. in the previous year.

Leprosy.—The number of recorded deaths from leprosy was 1,304 against 1,517 in 1939, representing a reduction of 14 per cent. The rural areas recorded 1,273 deaths from the disease during the year under report, the largest number of deaths having occurred in the district of Bankura. With a view to ascertaining the incidence of leprosy and suggesting measures for the control of the disease, a number of sample leprosy surveys were carried out by the British Empire Leprosy Relief Association in co-operation with the Public Health Department of Government. A training class in leprosy was conducted by this Association, which was attended by a good number of medical and health officers. The Association also carried on propaganda work with the usual grant from Government. As a first step towards the control and eradication of this fell disease, Government approved one of the important items of the comprehensive scheme prepared and submitted by the Director of Public Health, according to which a start was made in conjunction with several local authorities in the matter of establishment and maintenance of leprosy clinics mainly in rural areas.

Fairs and festivals.—The Director of Public Health has given an interesting account of the usual medical and sanitary arrangements made by the local authorities concerned in co-operation with the staff of the Director of Public Health, for the welfare of the pilgrims and the prevention of outbreaks of infectious diseases in the chief melas in the province, viz., Ganga Sagar, Nangalband, Sitakund, Tarakeswar and Allowakhawa melas. The St. John Ambulance Corps rendered valuable assistance at the Ganga Sagar Mela as in the previous years. It is gratifying to observe that no deaths from either cholera or small-pox occurred at these melas during the year under review.

Sanitation and water-supply.—Rs. 53,18,958 or 38·4 per cent. of the total receipts inclusive of the opening balance was spent by municipal bodies in Bengal on sanitary works during the financial year 1939-40, an increase of 0·8 per cent. compared with the expenditure in the preceding year. The average expenditure per head of the municipal population was Rs. 2-4-2 in 1939-40 which was practically the same in 1938-39. Of the total municipal expenditure on sanitation Rs. 24,68,518 was spent on conservancy, Rs. 12,80,798 on water-supply and Rs. 5,19,202 on drainage. The district boards in the rural areas continued to maintain their proportionate expenditure on water-supply, drainage, sanitation and vaccination, having spent 3·8, 0·2, 9·6 and 1·2 per cent. respectively of their total receipts during 1939-40 as compared to 3·9, 0·3, 9·7 and 1·2 per cent. during the previous financial year.

The union boards spent from their funds Rs. 8,18,515 on water-supply, Rs. 94,463 on drainage and Rs. 98,915 on conservancy in 1939-40 showing a large decrease on the first item and an increase on the latter two items over the expenditure in 1938-39.

According to the decision of Government to solve the problem of adequate supply of drinking water in the rural areas of the province within a limited period the preparation of comprehensive programmes of water-supply in the different districts was taken up in the year under review with the co-operation of the district boards and in consultation with the local water-supply committees set up for the purpose. Meanwhile, the annual grant for the improvement of rural water-supply, augmented as in the previous year, was distributed as usual among the different districts of the province.

The present skeleton public health organisation consisting of a public health unit in each thana under the charge of a Sanitary Inspector, which is being maintained by Government since 1927 has been found to be wholly inadequate for dealing with the manifold public health problems of the

province. A comprehensive scheme for complete reorganisation of the rural public health services was, therefore, framed by the Director of Public Health. The scheme, the fundamental principle of which is the combination of preventive and curative measures, envisaged the establishment of a treatment centre in each unit of two union boards to be placed in charge of a specially trained Rural Medical Officer of Health assisted by two Health Assistants and one qualified dai and the appointment of an Assistant Medical Officer for each subdivision, the entire public health work in a district being under the control and supervision of the District Health Officer who should be a Government servant. The scheme was under the consideration of Government. It was suggested to give effect to the scheme in selected areas but the district boards having expressed their unwillingness to co-operate in the scheme, this could not be given effect to, although suitable provision was made in the budget for the purpose.

School hygiene.—An account of the school health services at present provided for in Calcutta and in the municipal and rural areas has been given by the Director of Public Health and the results of the limited medical inspection of school students in these areas have been narrated. It should be noticed that the work of medical inspection of school children in Calcutta was transferred from the Education Department to the Public Health Department of Government with effect from 1st April 1940. During the year under review, 10,844 boys in 41 schools in Calcutta, 8,863 students in 125 schools in 26 municipalities and 1,750 boys and 72 girls in 54 schools in the rural areas were medically examined. The Sanitary Inspectors in charge of the rural public health circles also examined 207,988 pupils in 5,800 schools in the rural areas.

Health propaganda.—After the transfer of the Publicity branch of the Public Health Department to the Publicity Department of Government in 1939, Government took up the question of creation of a Health Education and Propaganda section under the Public Health Department. The Director of Public Health drew up a comprehensive scheme of Public Health Education and propaganda to be placed under his direct supervision under the direct administrative control of this department, as distinct and separate from the staff working under the Director of Public Information under the administrative control of the Publicity Department. No final decision could be reached on the scheme during the year under review. Pending decision on the scheme, however, one Artist and one Editor were employed during the year in connection with intensive and extensive public health education and propaganda. A weekly Public Health Bulletin was published throughout the year and posters, charts, models, etc., relating to public health propaganda were prepared and distributed as usual.

Miscellaneous.—The normal activities of the Public Health Department were maintained and their scope was widened in certain respects. Grants-in-aid were made to the local bodies as usual in order to enable them to make provision for health welfare services. Besides finding a moiety of the charge on account of Health Officers employed by the local bodies, a sum of Rs. 11½ lakhs was spent by Government in assisting district boards to maintain the existing rural public health organisation. The increased grant of Rs. 7½ lakhs from provincial revenues was repeated during the year under report for the improvement of rural water-supply. An allotment of Rs. 1,40,000 and Rs. 30,000 from the Government of India's second subvention for rural uplift was also made to the different districts for the improvement of rural water-supply and the improvement of rural sanitation respectively during the year under review. Other subsidies to local bodies included Rs. 1,20,000 for combating kala-azar and Rs. 50,000 for free vaccination as in the previous year and also an increased sum of Rs. 5 lakhs for the free distribution of

quinine. The usual grant of Rs. 10,000 to the Tuberculosis Association, Bengal, as well as to the Bengal Branch of the British Empire Leprosy Relief Association was also sanctioned. Assistance was rendered, as usual, by the Public Health Department to the local authorities during outbreaks of epidemic diseases, with extra staff, drugs and disinfectants.

General remarks.—The year 1940 was comparatively a better year from public health point of view. The increase in the total mortality in the province compared to the preceding year was mainly atrributable to malaria and the unspecified causes, while the deaths from other diseases either came down or remained practically the same as in the previous year. An outstanding feature of the health condition of the province during the year under review as already pointed out, was the lowest mortality from cholera recorded during the past fifty years. It will be observed from the foregoing paragraphs that the Ministry of Health have framed definite schemes for combating malaria, the principal problem of the province and also other epidemic diseases which constitute the greatest menace to public health and to reorganise the public health services of the province for advancement of personal and environmental hygiene, health, education and consciousness. Government trust that the local bodies, associations as well as the public in general will offer their unstinted help and support in these matters.

Personal.—Lt.-Col. A. C. Chatterjee, I.M.S., held the office of Director of Public Health thoughout the year. Government desire to place on record their appreciation of the services of Lt.-Col. Chatterjee and his staff in efficiently administering the department during the year under review.
